

Vroon is an international shipping company with a fleet of about 150 vessels and approximately 3,800 seafarers. In addition, the company currently has more than 30 newbuilding vessels on order. With its head office based in Breskens, the Netherlands, Vroon has offices in Barendrecht, Terneuzen, Den Helder, Aberdeen, Stokesley, Genova, Singapore and Fremantle (Australia). Vroon has about 300 shore-based employees.

Vroon Ship Management B.V. (VSM), located in Terneuzen, is part of the Vroon Group. VSM is responsible for the technical management of some 26 Vroon-owned ocean-going vessels (tankers, livestock vessels and car carriers) and employs a seagoing staff of about 800.

Vroon operates worldwide and, in order to do so successfully, we depend on a world-class organisation with highly qualified and motivated employees and on teamwork throughout our organisation. We are constantly looking for ambitious team players who excel in their area of expertise.

Vroon offers its employees extensive opportunities for career and personal development.

To enhance the continuing development of our organisation we are looking for candidates for the following position in our Terneuzen office:

Superintendent

In this function you will control and report the technical conditions as well as the operational expenses for a group of vessels in the fleet. You are responsible for technical-related unplanned off hires, port state control and vetting inspections. Furthermore, you will maintain communication with the Operations Department on all day-to-day matters in respect of voyage operations. You will schedule and supervise planned and unplanned repairs, inspections and dry dockings. As Superintendent you are responsible for the class status of the vessel and for arranging surveys. You work in a team consisting of a Crewing Officer, a Purchaser and possibly employees from other departments.

To excel in this function you should have a Higher Nautical or Technical Education diploma extensive experience as Chief Engineer/First Engineer and/or in ship repair/ship management. In addition, you have strong planning and organisational skills, are willing to travel frequently and are able to coordinate and work under pressure.
