Leaders in Safety

With a modern, versatile fleet and highly qualified and experienced colleagues, we are committed to making our clients successful by providing safe, reliable and cost-effective services.

Vroon Offshore Services (VOS) is a leading maritime offshore-services supplier, based in Aberdeen (UK). An international operator, VOS has been active in the offshore oil & gas market since 1964, today offering services to both renewable and oil & gas clients.

VOS excels in the provision of diverse services and solutions for key offshore-support needs, including field-support, emergency-response-and-rescue, multi-role-vessel, survey and subsea-support services. VOS Aberdeen is one of the market leaders for ERRV services on the UK continental shelf. A major part of the fleet has cargo-carrying capabilities, while some vessels have towing and tanker-assist features.

Supported by a team at the Vroon headquarters in Breda (NL), VOS also offers a wide range of complementary offshore services.

A highly qualified and professional team of on-board crews and shore-based colleagues handles the full management scope of our service portfolio, including commercial, ship-management and operational matters. The VOS office and vessels operate to the highest safety and operational standards, making use of extensive ISO (International Organization for Standardization) and Vroon-customised management systems.

Crewing support is provided by Deeside Crewing Services, also located in Aberdeen (UK).

SAFETY

Committed to safe practices in all operations and everyday actions.

We believe safety is a “way of being” and a mind-set. The Vroon way is to show our duty of care for the wellbeing and safety of our colleagues and those we serve. Implemented throughout Vroon, the behavioural-based safety programme “Leaders in Safety” forms an integral part of our safety mind-set. It empowers individuals to intervene when confronted by unsafe conditions (Five-Star intervention) and creates better situational awareness.

PEOPLE

Dedicated team of highly qualified and experienced colleagues, both on- and offshore.

The dedication, experience and high quality of our colleagues form the cornerstone of our service to clients. The professionalism demonstrated by all VOS employees results from extensive training and personal-development programmes, combined with many years of experience in offshore markets.

SERVICES

We care about our customers and business partners.

Working closely with our business partners across the Oil & Gas and Renewable-Energy market segments, we aim to enhance our capabilities, providing high-quality services and solutions to our customers and maintaining a flexible and professional organisation.

EXPERTISE

Leading maritime offshore-services supplier, with over 60 years’ experience in the business.

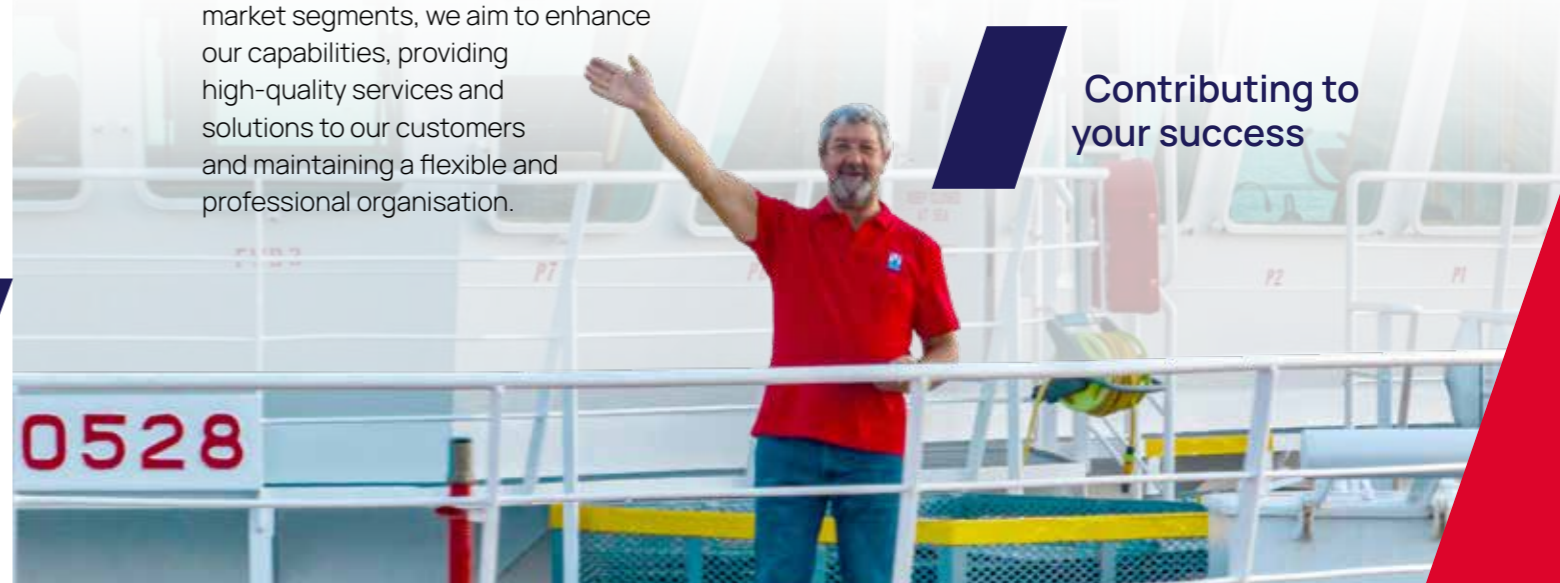

More than half a century of offshore experience, in combination with our dedicated staff and continuing fleet improvements, guarantees the unmatched expertise we offer our clients. Our office and vessels operate in accordance with Vroon-standardised processes and procedures. ISO management systems reinforce an ongoing commitment to delivering high-quality services, while still contributing to environmental sustainability. OHSAS (Occupational Health and Safety Assessment Series) certifications, based on a robust safety-management system, highlight our continuous focus on improving health and safety for all colleagues.

SUSTAINABILITY

We actively support developments that improve the sustainability of shipping operations and enhance protection of the environment.

Effective waste management and pollution prevention are embedded in the way we work. The optimisation of vessels for efficient fuel consumption is supported by power-management systems and operating procedures. We share best practices and co-operate with clients and business partners on sustainability initiatives.

Contributing to your success

Emergency response and rescue vessels

VOS operates approximately 34 emergency response and rescue vessels (ERRV). The emergency response and rescue service continues 24/7, 365 days/year at location.

The ERRVs, boasting state-of-the-art rescue equipment and rescue crafts, and their crews guarantee the safety of all who work on offshore installations. In addition to response and rescue duties, the vessels offer a range of extra services, including cargo operations, towage assistance, traffic monitoring, pollution control and general in-field support. With the main areas of operation being West of Shetlands, the North Sea and the Irish Sea Basin, our vessels and crews are skilled in operating during challenging weather conditions and able to respond to any emergency situation within two minutes.

- Dedicated ERRV operations
- Extensive medical facilities
- Fast-rescue-craft deployment
- Enhanced rescue equipment
- Guard vessel duties
- Deck and under-deck cargo capabilities
- Towage capabilities
- Tanker-assist operations

Subsea-support vessels

Our fleet also offers a wide range of subsea-support services. The vessels and their crews, assisted by dedicated experts ashore, can provide a safe platform for offshore divers, ROV (remotely operated vehicle) pilots, riggers and client personnel, offering the option for cranes with operating ranges up to 50 tons. We offer ultra-fuel-efficient four-point-mooring-positioning functionality, in addition to DP-2 operations. Our modern vessels are SPS-compliant and offer state-of-the-art ICT functionality.

- Subsea, ROV and survey support
- Seismic support
- Dive support
- Deck and under-deck cargo capabilities
- Extensive client email and data-communication facilities
- Crane operations
- Construction and maintenance support
- Windfarm-support duties
- Refuelling operations
- Transducer-station supply
- Dynamic positioning

Check our website www.vroonoffshore.com for more details about the VOS fleet and individual vessels.

VROON

Vroon is an international shipping company, dedicated to a sustainable future. We provide transportation and management services and solutions that are reliable, sustainable, cost effective and allow our customers to be successful.

A family-originated business, established in 1890, Vroon today operates and manages a diverse fleet of approximately 65 deepsea and offshore vessels. We deliver high-quality, safe and professional services and solutions, based on traditional values and a proven track record. Our operations meet stringent safety and environmental regulations. All vessels are subject to rigorous maintenance programmes and our highly experienced and well-qualified staff follow regular training courses.

Vroon is active in multiple shipping segments, with distinctive brand names and modern fleets:

- Offshore services and support (Vroon Offshore Services)
- Livestock carriers (Livestock Express)
- Product and high-heat tankers (Iver Ships)
- Vessel management services and solutions

Vroon attaches great importance to its Vision and Mission, Core Values and Culture, which provide guidance to all staff, at sea and ashore. The company has been a member of the Maritime Anti-Corruption Network (MACN) since 2015. MACN is a global business network working towards the vision of a maritime industry free of corruption that enables fair trade to the benefit of society at large.

With around 1,500 professionals employed worldwide, Vroon has the fleet to MEET your needs, the people to DELIVER and the determination to SUCCEED.
